President's Message

We welcome you to the 72nd annual show of the Northern California Camellia Society, here at the St. Andrew’s Celebration Center.

As you go through the show, keep in mind that these flowers -- some of the most beautiful in the world -- come from a plant that’s one of the easiest to grow. The best way to learn the ins and outs of growing camellias is to join the Northern California Camellia Society. You can get an application at our information desk, or just ask one of the society members. You do not have to be a member of the society to enter flowers in the show.

A big thank you to all the exhibitors, judges, clerks and you, the public. Without all of you, there would be no show. Please come again next year!
